

Machine

Daussiny developed and built its own laser welding unit. Together with the laser supplier and other top rank suppliers, a highly reliable production unit has been realised. The maximum size of the plate material we can process is 2000 x 14000 mm. The thickness of the upper plate can vary from 0,8 mm to 3 mm. The bottom plate can have a thickness of 0,8 mm to 15 mm.

Fast delivery

Due to our high speed laser welding unit combined with our in-house laser cutting capability up to 3000 x 12000 mm and a large stock of material we can guarantee fast delivery.

Pillowplate

In-house laser cutting up to 3000 x 12000 mm.

Stock material stainless steel
